SHRISHTI

Computer Science Engineering (AI & ML) • Software & Mobile Developer

Location: Panchkula, Haryana, India • **Phone:** +91 7009366199 • **Email:** shrishti2905@gmail.com

Portfolio: `https://shrishti-19.github.io/myPortfolioShrishti.github.io/`

PROFESSIONAL SUMMARY

Motivated Computer Science (AI & ML) undergraduate with proven experience building full-stack platforms, cross-platform mobile apps, and on-premise security tooling. Skilled in leveraging AI-assisted development tools (Google Antigravity, Google AI Studio) to architect and deliver production-ready solutions, including an active application on Google Play, an air-gapped cryptography auditing engine, and local enterprise systems.

TECHNICAL SKILLS

Languages:	Python, C, C++, C# (.NET), TypeScript, JavaScript, SQL, HTML5, CSS3
Frameworks & Libs:	.NET MAUI, FastAPI, React, Vite, Tailwind CSS, TanStack Query, CustomTkinter
AI & Emerging Tech:	Google Antigravity, Google AI Studio, ONNX Runtime, Hugging Face, Prompt Engineering
Databases & Tools:	Microsoft SQL Server, SQLite, Git, GitHub, Visual Studio, VS Code, Blender 3D, Unity 3D

INTERNSHIPS

- **Indian Institute of Technology (BHU) Varanasi** — Technical Intern (Virtual / Online) **Completed**
- **InternVision** — Software Development Intern (Virtual / Online) **Completed**

FEATURED PROJECTS (PART I)

Sugar Tracker App • Mobile App (Android)

Status: Live on Google Play

.NET MAUI • C# • XAML • SQLite • Native Canvas API • Android SDK • Google Antigravity

Live Link: `https://play.google.com/store/apps/details?id=in.testskill.sugar`

- Architected and developed an offline-first glucose monitoring Android app using Google Antigravity for rapid prototyping and validation.
- Designed local SQLite storage schemas for secure biometric logging with zero data-leak risk.
- Built interactive data visualizations using Native Canvas API to render chronological blood glucose trend graphs.
- Delivered an intuitive, responsive mobile UI resulting in frictionless record entry and automated pattern detection.

Privacy-First Code & Text Cryptography Auditor • Security Desktop & CLI

Status: Completed

Python • ONNX Runtime • Hugging Face • CustomTkinter • AST Analysis • Google Antigravity

- Architected an air-gapped compliance tool leveraging Google Antigravity to perform 100% local, zero-data-egress scanning and automated PII sanitization.
- Engineered a hybrid detection engine pairing fast regex filters with quantized ONNX Transformer models for real-time redaction.
- Reduced false positive alerts by over 85% by incorporating Shannon entropy scoring, Luhn checksums, and AST entity denylists.
- Delivered dual workflows: an interactive CustomTkinter desktop GUI and a headless CI/CD-ready CLI producing JSON, CSV, and Markdown audit reports.

FEATURED PROJECTS (CONTINUED)

Enterprise HRMS Portal • **Full-Stack Web Platform (Localhost)** **Status: Completed (Local Deployment)**

React • TypeScript • Tailwind CSS • FastAPI • MS SQL Server • TanStack Query • Google Antigravity

- Spearheaded end-to-end development using Google Antigravity for schema mapping, API scaffolding, and endpoint security testing.
- Implemented JWT-based Role-Based Access Control (RBAC) across Admin, HR, and Employee tiers for granular permission management.
- Automated core organizational workflows including UTC-synced attendance tracking, leave approval state machines, and company announcements.
- Developed an interactive split-pane ticketing desk with dynamic status state machines and integrated TanStack Query client caching.

Pebble Path • **Browser-based Web Game** **Status: Under Development**

React • TypeScript • Vite • HTML Canvas • Web Audio API • Google AI Studio

- Designing and developing a relaxing, no-fail-state browser puzzle and resource-management game using Google AI Studio-assisted workflows.
- Built an 8-stage path-placement puzzle mechanic with chapter-based progression and an isometric canvas home world with auto-gathering nodes.
- Engineered an in-game economy with 7+ materials, weapon forging, upgrade trees, and procedural audio feedback.

Personal Developer Portfolio • **Web Platform** **Status: Live Website**

HTML5 • CSS3 • JavaScript • Responsive UI Design

Live Link: `https://shrishti-19.github.io/myPortfolioShrishti.github.io/`

- Designed and deployed an interactive personal portfolio showcasing development projects, resume deliverables, and technical competencies.
- Implemented responsive cross-device layouts and accessible UI components adhering to modern web standards.

EDUCATION

B.Tech in Computer Science & Engineering (AI & Machine Learning) **Expected 2027 • Currently Pursuing (Sem 7)**

State Institute of Engineering and Technology (SIET), Panchkula, Haryana (Affiliated with Kurukshetra University)

Latest SGPA: 7.67 (Semester 6) • Coursework: Data Structures, Algorithms, AI/ML, DBMS, Operating Systems

Senior Secondary Examination (Class XII, CBSE) **May 2023 • Completed**

Govt. Model Sanskriti Sr. Sec. School, Sector-20, Panchkula • **Scored: 77.4%** (Physics, Chemistry, Maths, English Core)

Secondary School Examination (Class X, CBSE) **June 2021 • Completed**

Holy Child School, Morni Road, Panchkula • **Scored: 94.2%** (English, IT, Science, Mathematics, Social Science, Hindi)

HONORS & CERTIFICATIONS

- **Accenture iAspire:** Unlocked Gold Level (Go for Gold Contest)
- **Reliance Foundation:** Python Programming Certification
- **Learn Skillible:** Introduction to Generative AI Certification
- **IBM SkillsBuild:** Certified in Web Development
- **Infosys Springboard:** Introduction to Artificial Intelligence
- **LetsUpgrade:** SQL Bootcamp Certification
